PLAYWRIGHT TYPESCRIPT ESSENTIAL KIT · 2026

Start Here

Your guided walkthrough of the Essential Kit

Eight files, in the order to open them. What each one is, why it matters, and exactly when to use it, from the day you begin to the morning of your interview.

Eight files | **Three** simple phases | **Day 1 to** the interview

by **Sreenidhi Rajakrishnan** · QA & SDET Educator

WELCOME

Everything for the interview itself is right here. Here is how to use it.

Take a breath. What you have just opened is not a pile of PDFs to get through. It is a focused, ordered path to your Playwright and TypeScript interview, and this short guide is the map. It is File 1 of the eight in your Essential Kit. By the end of these pages you will know exactly which file to open next, what each one is for, and when in your preparation to use it.

Everything in the kit is tailored to TypeScript, and everything works together. You do not need to study it all at once. You need to start, and to trust the order. That is what the next few pages give you.

Every file in your Essential Kit, numbered as in this guide. The next page shows the order to open them.

1	2	3
Start	**Learn**	**Practice**
Read this guide	Build the knowledge	Rehearse out loud

THE SHAPE OF IT

How your eight files fit together

Three phases, in order. Start with this guide, build the knowledge, then rehearse it until the answers come without effort. You will meet every file in this guide, grouped exactly like this.

1 **START** *Know the order*

- **Start Here Guide** · you are reading it

2 **LEARN** *Build the knowledge*

- **300+ Q&A, Expanded** · the core
- **100+ Coding Kit** · programs
- **This vs That** · comparisons

3 **PRACTICE** *Rehearse until it is automatic*

- **Quick Revision** · the night before
- **Explain Your Framework** · your level
- **Real-Time Scenarios** · the difficult ones
- **The Mock Paper** · score yourself

ON ANY SCREEN

Every file is laid out to stay crisp on a laptop at your desk, a tablet on the sofa, or your phone on the train. Study wherever you are.

A PLAN FOR YOUR TIME

A simple five week plan, from your first morning to the interview

You never have to wonder what to do today. This plan uses only the eight files in your Essential Kit. Adjust the weeks to the time you have, but keep the order.

Your first week *days 1 to 7*

Read this guide, then open section one of the 300+ Q&A and aim for one section a day. Each evening, type out two or three programs from the Coding Kit. Keep a short list of any question that still feels shaky. That list becomes your revision plan later.

The building weeks *weeks 2 to 4*

Keep to one section a day, so all twenty eight sections are done within four weeks, and take the quiz at the end of each section. Add a few programs from the Coding Kit each evening, one Coding Kit section at a time. Rehearse This vs That for ten minutes most days. From week three, start learning your sixty second framework answer, and near the end of week four sit the Mock Paper for the first time.

The sharpening week *week 5*

Switch to Quick Revision. Let your Mock Paper scores decide where to spend these days, and say the Real-Time Scenario answers out loud. Sit the Mock Paper once more at the end of the week and mark it honestly.

The last 48 hours *before the day*

Quick Revision only. Reread your framework answer and the real-time scenarios, skim the Mock Paper answer key, and then stop. Rest matters more than one more hour of reading.

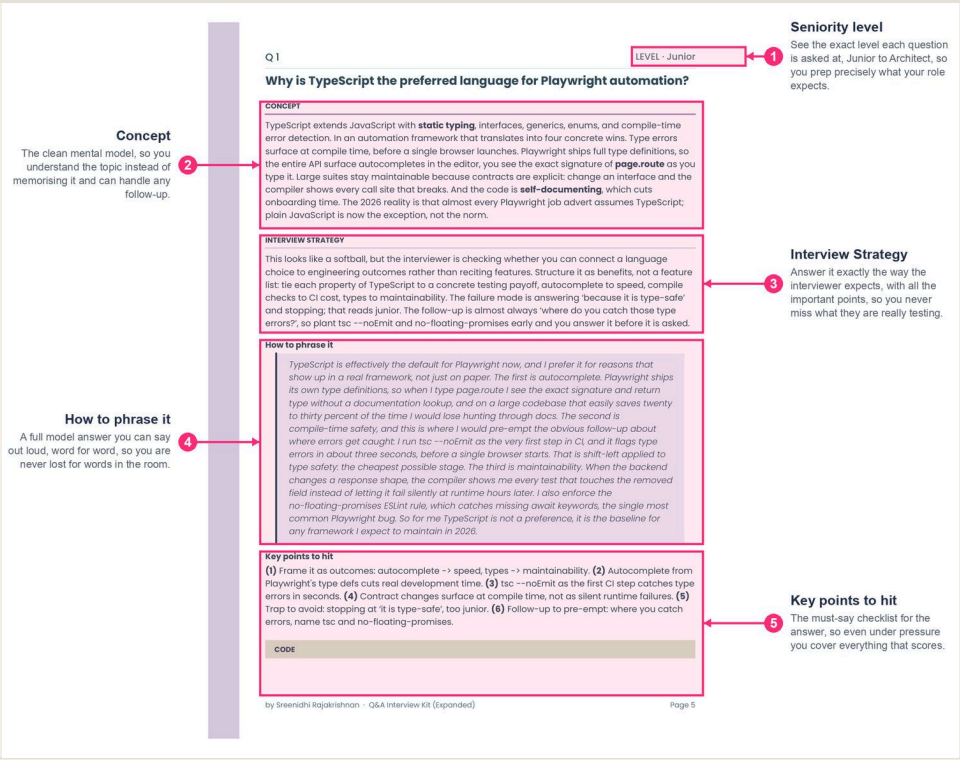

The morning of *interview day*

The condensed lines and your sixty second framework answer, once through. Then close the files. You have done the work. Be calm and confident.

PHASE 2

2 Learn: build the knowledge

Build the knowledge you will actually be tested on

File 2 The 300+ Q&A, Expanded

Every answer is built the same way. Here is what each part gives you.

300+ questions | **28** sections | **652** pages | **Full** answers

WHAT IT IS

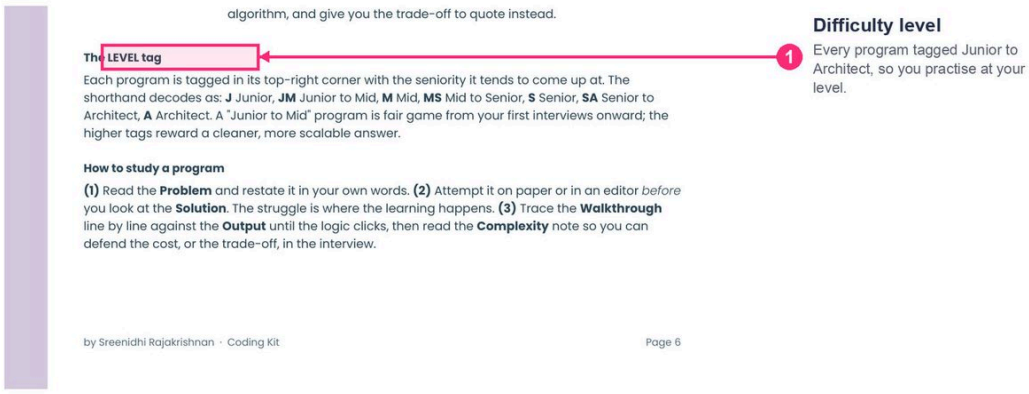

The core of the whole kit. Over three hundred interview questions across twenty eight sections, each answered in full. Every answer carries the concept, what the interviewer is really testing, the exact words to say, the points you must cover, and runnable TypeScript code wherever seeing it helps. Each section ends with a short quiz and answer key.

WHY IT MATTERS

These are not notes. They are answers you can say out loud. Read one card and you can answer that question in the interview, in your own confident words.

> **WHEN** Your main study material from day one through week four, one section a day, in the order the kit sets out.

> **HOW TO USE IT** Read the concept, then cover the answer and say it out loud before you check the model words. Speaking it out loud is what registers it deep in your memory.

File 3 The 100+ Coding Kit

Problem, approach, solution, real output, walkthrough and complexity, every time.

100+ programs | **199** pages | **Real** output shown

WHAT IT IS

Over a hundred programs you may be asked to write, each solved and explained end to end: the problem, the approach, the solution, the real output, a step by step walkthrough, and the complexity.

WHY IT MATTERS

You will not meet a coding round shape this kit has not already walked you through. Seeing the real output beside the code is what helps it stay in your memory.

> **WHEN** Alongside the Q&A from your first week, and heavily in the days before any coding round.

> **HOW TO USE IT** Type each program yourself and run it. Then close the solution and rebuild it from the approach alone. That is the skill the interviewer tests.

File 4 This vs That, Rehearsal Cards

21 comparisons | **5** pages | **Difference** first

WHAT IT IS

Every “what is the difference” question, answered with the real difference first and then the choice you would make. Playwright versus Selenium, locator versus handle, workers versus shards.

WHY IT MATTERS

The versus round is where good candidates fumble. Lead with the real difference and the choice sounds obvious, so this round never surprises you.

Rehearsal cards, made to be covered and answered out loud.

WHEN Once your basics are solid, from about week two, in short rehearsal sessions.

HOW TO USE IT Cover the answer, say it out loud, and only move on when you can say it smoothly.

ALREADY CONFIDENT? If a topic already feels easy, open the Quick Revision from the Practice phase and test yourself on it. Read each question, answer it in your mind, and check whether your words match. It is a fast way to find the gaps you did not know you had, before you spend hours reading.

PHASE 3

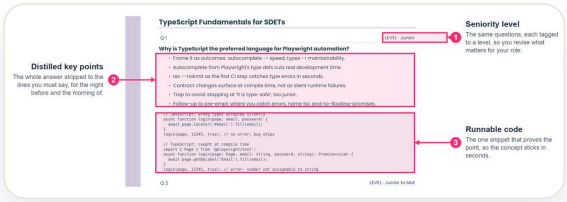

3 Practice: rehearse until it is automatic

Rehearse out loud until the answers come without effort

File 5 Quick Revision

300+ answers | **170** pages

Condensed for speed

The same questions as your 300+ Q&A, condensed to what you say.

WHAT IT IS

The whole question bank stripped to the lines you must actually say. The same curriculum as the Expanded Q&A, in answer only form.

WHY IT MATTERS

Built for the night before. No hunting, no scrolling through hundreds of pages at eleven at night. Just the lines that score.

> **WHEN** The final week, the night before, and the morning of.

> **HOW TO USE IT** Do not read it like a book. Scan for the questions that still feel shaky and drill only those.

File 6 Explain Your Framework

15 pages · 60 sec version · Worked example

The framework walkthrough, plus the real-time scenarios in File 7.

WHAT IT IS

The complete framework walkthrough that decides your level, with a full worked example and a sixty second version you can open with.

WHY IT MATTERS

You may work in TypeScript every day and still freeze when asked to explain your framework. This is the answer that shows your level.

WHEN Once your framework knowledge is in place, from week three, rehearsed until it flows.

HOW TO USE IT Learn the sixty second version by heart. Open with it, then go deeper only where they ask.

File 7 Real-Time Scenario Q&A

18 scenarios · 10 pages · Four beats

WHAT IT IS

Eighteen on the spot situations, the questions people least prepare for: the test that passes on your laptop and fails in the pipeline, the retry that hides a real bug, the release tomorrow with twenty tests red. Each one shows what the interviewer is really testing, how to answer, and the words to say out loud.

WHY IT MATTERS

These are the questions that separate a senior from the rest. Having answered them once on paper means you are never caught unprepared.

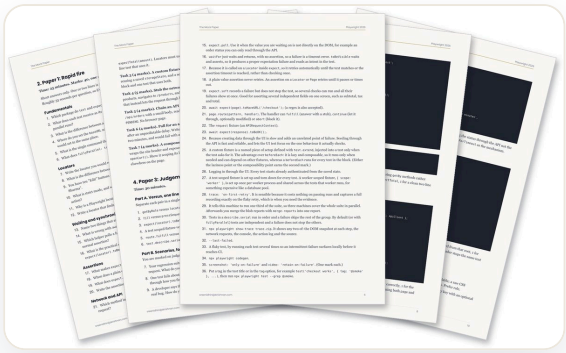

WHEN In your final week, alongside Explain Your Framework.

HOW TO USE IT Answer in the four beats the file teaches: restate the situation, say what you would look at first, give the fix, and close on the process change.

File 8 The Mock Paper

100 marks | 3 timed papers | 17 pages

Full answer key

Timed papers out of 100, with the full key to score yourself.

WHAT IT IS

Three timed papers worth one hundred marks: rapid fire recall, writing real code, and judgement with versus and scenario questions. A complete answer key and a score band table tell you honestly where you stand.

WHY IT MATTERS

Find your gaps before the interviewer does. You go into the interview already knowing your score and where to spend your last days.

WHEN Near the end of week four, then once more in the final week.

HOW TO USE IT Time yourself honestly and mark strictly. Your lowest scoring sections are your revision list, already written for you.

BEFORE YOU SIT IT Set a real timer for each paper, close every other file and tab, and answer from memory. Then mark yourself the way a stranger would. An honest score is the one that helps you most.

ONE LAST THING

You are more ready than you think.

> *You do not need to be perfect on day one. You need to start, follow the order, and keep going. This is the same order I teach every SDET I guide, from their first morning to their offer letter.*

Trust the path. Build the knowledge, rehearse it out loud, and walk in ready. Do today's section, close the file, and come back tomorrow. That is the whole method, and it works.

THREE THINGS TO DO THIS WEEK

- **Start section one of the Q&A today.** Read the first answer, cover it, and say it out loud, then aim for one section a day.
- **Type your first programs from the Coding Kit this week.** Two or three each evening, run them, then rebuild one from the approach alone.
- **Put the Mock Paper in your diary for the end of week four.** Score yourself honestly, then spend your last days exactly where it points.

WHEN YOU WANT THE FULL PATH

The complete Playwright TypeScript Interview Kit builds the path around your preparation: a 45 Day Calendar and a Daily Learning Journal to pace your days, a CI/CD Kit and GitHub Portfolio Setup to make your skill visible, and three ATS resumes with LinkedIn and Naukri optimisation to reach recruiters. If you would like that full path later, you can move up from your Essential Kit any time.

FROM SDETS I HAVE GUIDED

★★★★★

She explained the whole SDET journey: where to start, what to study, and how to prepare for interviews. She laid out the path clearly.

Ashish K.

★★★★★

A fantastic mentor. Her interview coaching boosted my confidence to face interviews with ease.
